Full Glow - High on Efficacy

We target customers looking for......

Surface of light with performance like never before, high on energy efficiency & fits the Budget.

Technical specifier

"My challenge is to translate the architects' concept and the user requirements into a working solution within the **building and budgetary reality**.

I am passionate about the technical performance of the system - and want to get the most out of the design, including the required light levels for **the least energy rating**. Proven solutions are preferred because they will keep the customers happy with a reliable system." "I'm looking for recessed luminaires that have a flat surface of light simply gels in the modular ceiling, is energy efficient and is able to provide smooth glare free light for my office.

It should also fit my Budget and give me a payback of less than 1.5 Years.

Lighting the path to productivity

Ambiance: Visual appeal is one way that lighting improves workplace effectiveness. More attractive facilities will be used more effectively for longer periods of time. Bright, inviting general lighting can highlight reception areas and elevator banks, and make public areas appear relaxed and welcoming.

Sustainability: Many corporations see a greener future ahead because sustainability means improving competitiveness. The U.S. Green Building Council's LEED Building Rating System has shown that top companies do well by doing good, too, with green buildings that deliver better bottom-line performance. With that in mind, choosing highperformance, green lighting solutions shows that your organization takes its role as an environmental steward seriously. Earning respect from employees and customers could translate into better financial performance.

<u>Well-being:</u> Applied correctly, lighting motivates people and helps them accomplish goals. Adaptable lighting can help improve occupant comfort, boost their energy, and increase workflow efficiencies. Too much light—or too little—can intensify worker fatigue. Flexible lighting can motivate employees by accommodating varying work styles and business demands. When occupants are in control of their environments, they are more at ease and more able to positively affect their productivity.

Full Glow: Efficient, Maintenance free, Glare free, Long Life, Easy To Experience.

Performance: A perfect blend of the latest LED technology and efficient optics ensures perfectly uniform illumination.

Long-life: Controlled Design/ manufacturing ensures quality and use of long-life materials ensure Robust Product.

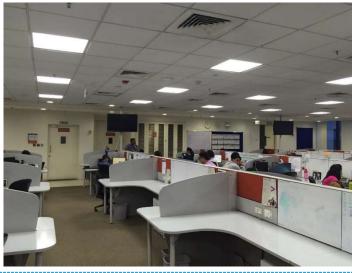

Simple and quick: Easy to Install without any specialized tools.

Fit and Forget: A long service life and almost complete freedom from maintenance significantly reduce operating costs.

Low Total Cost of Ownership

Across a long lifetime of reliable operation

- Good balance between initial cost and return on investment
- Payback within 1.5 years
- Outstanding Back-lit solution efficacy (up to 125 lm/W)
- Ease of installation and maintenance saves time and money

Your office, your way

Whatever your celling height, the varied lumen packs, can have optimal design for your office application — expert Philips engineers can design the optimum settings for typical offices.

You can design:

Open-plan offices Private offices Meeting rooms

Focus on general illumination applications

- Office
 - Open plan
 - Cell office
 - Meeting room
- Retail
- Healthcare
- Hospitality

Application insights

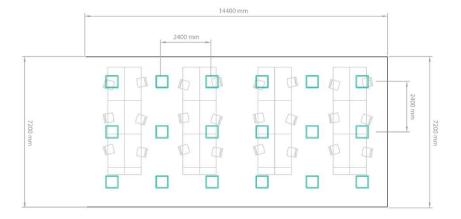

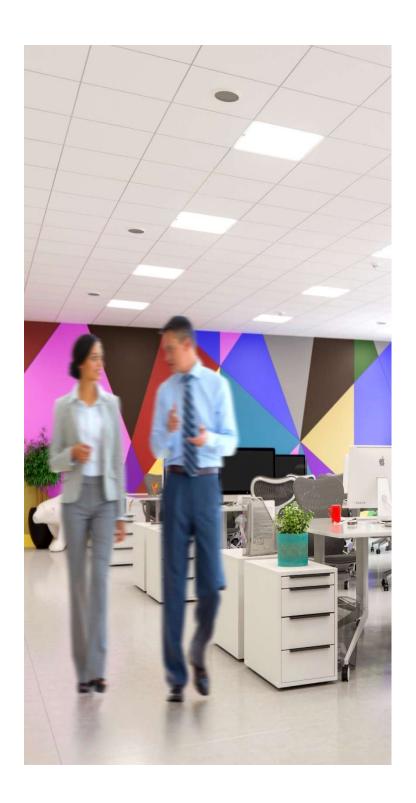

Open office

Use: Mainly for individual work; occasional chats with co-workers

Lighting design: Regular grid of recessed luminaires (square or rectangular) with a comfortable and soft appearance

Result: Employees can focus on their work without distractions or disturbances from the environment

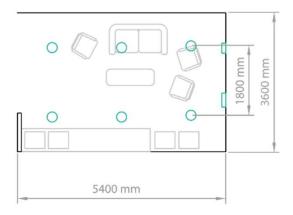

Breakout areas

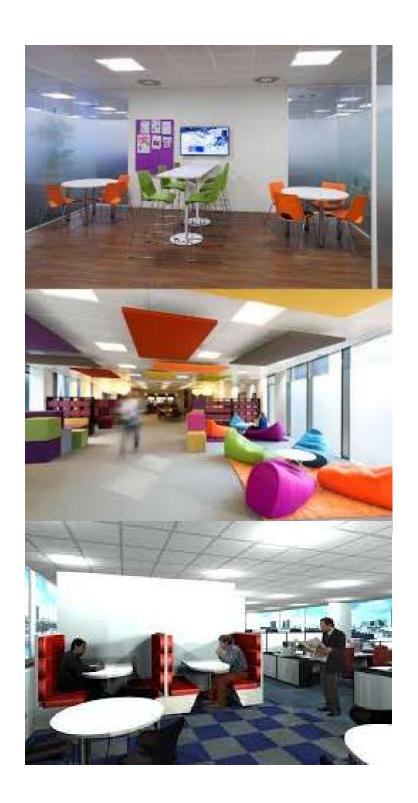

Use: An area for relaxation and inspiration

Lighting design:

- Recessed array of higher lumen pack version based on the application needs
- Luminaires completely flushed with the ceiling

Result: Greater contrast and more highlights create a different ambiance and a change of scene for office workers

Control at your fingertips Increase efficiency while costs fall

Savings

25% less installation costs and 50% less commissioning costs

Multiple Lumen Packs

Due to granular insight of actual office applications, e.g. suitable for 2x2, 3x3, 4x4 grid spacing.

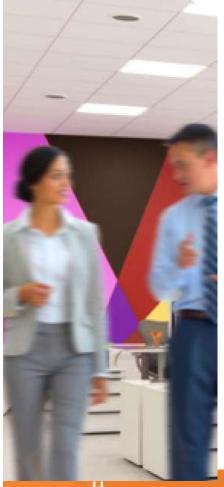

Integrated control

Available with DALI , POE , C4M

Full Glow L70B50, 50K Hrs. Reliable Fits in Budget Reliable **EC** Efficiency 120 Lumen/Watt **Environment** Easy-to-install Friendly Easy to Install

Flat Surface of Light

Open office

The bulk of our offices still consist of open plan offices where employees have fixed or flexible desks. Used mainly for individual work with the occasional chat with co-workers, this space demands a lighting design that focuses on getting the job done. As such a regular grid of recessed luminaires (either square or rectangular) with a comfortable and soft appearance helps with creating an environment where employees can truly focus on the work and the environment itself does not distract or disturb but instead 'disappears' into the background.

High quality, energy efficient lighting that reduces your energy bill

Low Total Cost of Ownership and return on investment

Suitable for higher ceilings that optimize space and ventilation

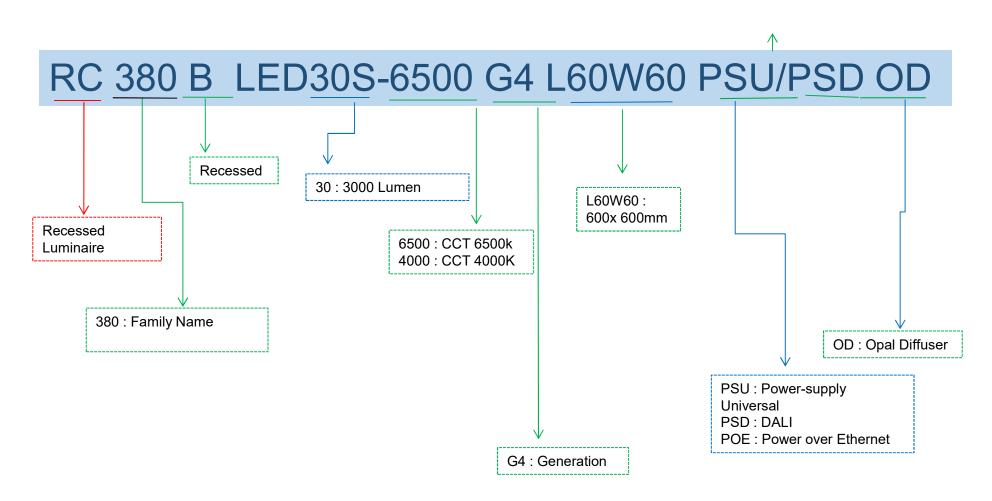

Helps declutter the ceiling and create a more attractive environment

ATTENTION: Install in accordance with national and local building and electrical codes.

MI Sheet

How can we help you?

Support from start to finish

Advisory services

Clear insight into your current lighting system, how it can be improved, and the benefits you would gain

Lifecycle services

Variety of project after-care contracts that cover all aspects necessary to guarantee long-lasting, hassle-free performance

Project services

Design, control and coordination activities necessary to take a lighting solution from the drawing board into reality

Lighting capital

This enables you to acquire a state-of-the-art, business enhancing solution immediately – with little to no upfront capital investment required

Why choose Philips?

A lighting service that fits your business needs

We listen to and understand your needs:

Global presence and local experience delivering multi-tiered support

One-stop shop: solutions and services across the lighting value chain

World-class innovation capabilities and deep application and system expertise

Proven record of quality and reliability – no unpleasant surprises
